

## **Why choose EOP**

Google has decided to retire Postini and shift its users over to Google Apps for Business.

If you are currently a Postini customer the price could increase to 500% more per user.

Now that you know how much more you will be paying, let's talk about what will happen when you are switched over to Google Apps:

Not all of your Postini settings will be imported over, including important data like your white lists and black lists.

Google Apps will be asking you a lot of personal details so it can collect demographic info and your online behavior information.

How much of your private life do you want to give out?

How much time do you really have to set up all your filters again?

How much more money can you afford to dish out?

Instead, why not switch to Exchange Online Protection?

With EOP you get the same level of protection you *had* with Postini, and with a *seamless migration*.

You'll be able to import all of your Postini settings and filters, so you can stay organized before *and* after your migration.

## **IT Costs**

We know there are a lot of IT costs to handle all of your users.

Businesses who aren't proactive and don't want to switch will soon be charged \$5.00 per user per month. And since Google Apps doesn't have the Postini security features you'll have to pay extra for the same security services you were using before.

Exchange Online Protection has the security features you need for your business and is only \$1.00 per user!

## **Compare with others**

And unlike Google Apps, Exchange Online Protection actively protects your communications

with built-in defenses against viruses, spam, and phishing attacks at no extra cost.

### **Benefits of EOP**

Maximize profit, minimize downtime.

Exchange lets your users be more productive by helping them manage increasing volumes of communications across multiple devices and work together more effectively as teams.

### **Impact of EOP**

Exchange Online Protecting delivers reliability, availability, and performance with a guaranteed 99.9% uptime, a financially-backed service level agreement.

### **Who We Are (nerds with awards)**

Iron Cove Solutions provides IT support in Los Angeles as well as around the world. We have completed over 600 customer cloud implementations and achieved with Microsoft their "Cloud Accelerate" and "Portals and Collaboration" Silver Competency status. Our IT team delivers fast and reliable service. We don't just deploy you and leave you high and dry.

### **Cloud Support**
